Notes: Rhentaflock recommends moving the coop to a new location every several weeks and changing the bedding once a week. Hens love to wander around the yard--- we recommend hens enjoy free-ranging for at least an hour or longer a day. If hens are out of the coop, they should be monitored to protect them from predators such as hawks, dogs and/cats. The hens must always have access to clean water. In weather over 85 degrees the chicken coop should be moved to a clean and shaded area. If the customer feels the hen (s) are ill feel free to **email, call or text Jean or Patrick McBride at 774-309-0402. If you feel hen (s) requires veterinarian care, this will come at customers own expense.**
